

## Still Photos (continued)

Below are listed all the LCTs in the card catalogs for which there are photographs. WARNING: Don't stop here--there are lots more LCT photos! You have to look up under other topics such as Normandy, Philippines, Guam, Norfolk--anything associated with the Navy and you will come across more LCTs. Look through the entire box they bring you and you may stumble onto several more. That's how I found the LCT-504 pictured on page 9 of this edition!

You may even want to look under Army topics! They filed the photos by however the military originally labeled them. Again, look through the index early in the day and expect a one hour wait for them to be "pulled". Good hunting!

### LCT

33	217	369	482	594	781	918	1057	1269

## Motion Pictures

The Archives has a huge collection of movie footage from WW2 on the 4th floor at College Park. The films are the ONLY resource you can access on your own much like books on a library shelf. You look up the topics, pull them and then go to a viewer and watch the movies! Staff assistance is always available.

The listings there are easy enough to read but for those of you with internet access, it is MUCH easier to look up your topics in the comfort of your own home ahead of time. This way you are all ready with the code numbers when you get there! The website is:

<http://www.nara.gov/nara/nail.html>

## NAIL Search for Motion Pictures

Access the NARA website and you will be ready for what they call a NAIL search. I have illustrated how this works below. Just follow the prompts in the program.

1. Click on **Search for Archival Holdings**
2. Click on **NAIL Standard Search**
3. You will get. . .

Submit Search | Display Results | Clear Form | Help | Exit NAIL

Total Hits Retrieved: 0 Hits to Display: 1150

Only Descriptions Linked to Digital Copies

Enter Keywords: Keyword Help

AND  OR  NOT

Priority

4. Type in a *Keyword* and a defining topic such as **LCT** and **Normandy**. The system will locate all films with both LCT and Normandy listed in the subject matter.
5. Click on **Submit Search**--make sure at the bottom you have both **All Media** and **All Units** highlighted.
6. You will get another box like above listing the total number of "hits retrieved". Click on **Display Results** and you will see this. . .

Hit	Media	Description Level	Control No.	Title, Dates, Creator	Full Results	Select
1	Motion picture film	Item	Control No. NWD14404-428-NFC-2017	Title: INVASION OF EUROPE (NORMANDY), 06/1944	Full	<input type="checkbox"/>
2	Motion picture film	Item	Control No. NWD14404-428-NFC-2020	Title: INVASION OF EUROPE, 06/21/1944	Full	<input type="checkbox"/>
3	Motion picture film	Item	Control No. NWD14404-428-NFC-4370	Title: INVASION OF EUROPE, 06/21/1944	Full	<input type="checkbox"/>

7. Select one of the films and click on **Full** for a complete listing of the films contents. Be sure and make copies of these details so you have the needed numbers when you get to the Archives.

## Getting Copies on VCR Tapes

If after viewing a film at Archives you decide you'd like to have a copy of it, ask the staff to get you set up. They will literally sell you a blank VCR tape for \$20 and show you how to record it yourself. This is also easy and you can edit out content you don't want.

A few bits of advice here--allow plenty of time to view and record films, you can easily get carried away looking at all the footage they have! Most WW2-era films are without sound and black/white. The color films are not as clear and many of the films are of poor quality. Many have had an annoying "counter" placed electronically in the corner which just stays there and looks like an odometer clicking away. But these films are still precious records and worth recording.

Have fun and good luck!
